Dairy Seminar

Theme:
“New Technologies for Milk Processing”
April 23-24, 2015

Venue:
Bombay Exhibition Centre, Western Express Highway, Goregaon (E), Mumbai, India

Koelnmesse Invites you to...

Koelnmesse YA Tradefair Pvt. Ltd., the Indian sub-sidiary of Koelnmesse GmbH, Germany – the organisers of world leading trade fairs like ANUGA, Anuga FoodTec, etc. has emerged as one of the leading international trade fair organizer in India, covering various industry sectors like food, dairy, snacks, confectionary, heavy metals and many more.

The 2nd edition of India International Dairy Expo (IIDE), scheduled to be organized during April 23-25, 2015 in Mumbai is all set to bring the dairy industry of the Indian sub-continent together once again. The exhibition will have around 150 companies displaying their products and services offered to the dairy industry and will be spread over an exhibition area of 7000 sq. mt. Dairy Seminar on “New Technologies for Milk Processing” will be organized by Indian Dairy Association (West Zone) concurrent to IIDE 2105 at the same venue.

We invite all the stake holders of the dairy industry – dairy farmers, suppliers of dairy farm equipments, veterinary, processing and packaging technology, refrigeration and cold chain solutions and manufacturers of milk and milk products to be part of this dedicated dairy industry event.

Ashwani Pande, Managing Director
Koelnmesse YA Tradefair Pvt. Ltd.

IIDE 2015

The milk processing plants in India handled only one third of the total milk produced during 2013-14. This left 268 million ltrs. milk per day in the unorganized sector. However, to increase the share of the organized sector, new milk processing plants with latest processing technologies, packaging and distribution systems will have to be created. The new technologies will have to majorly address energy efficiency, environment friendliness, loss prevention, product traceability and of course overall value addition.

Indian Dairy Association (West Zone) and Koelnmesse YA Tradefair Pvt. Ltd. are jointly organizing IIDE 2015, Second Edition of “India International Dairy Expo”, an exhibition of dairy farming, processing, packaging, distribution and products from April 23 – 25, 2015 in Mumbai. Concurrent to the IIDE 2015, IDA (WZ) is also organizing a National Seminar on ”New Technologies for Milk Processing” on April 23–24, 2015.

I appeal to all the equipment and product manufacturers in the dairy industry to participate in IIDE 2015 and the Seminar. I wish you all a Very Happy & Prosperous New Year.

Arun Patil, Chairman,
Indian Dairy Association (West Zone)

Concurrent Seminar by IDA-WZ

DSK Milktronics Private Limited

We DSK Milktronics Private Limited, an entity of Rs 5000 Crore Conglomerate DSK Group having strong business interest in Realty & Infrastructure, Automotive Manufacturing & Distribution, IT & IFS, Hospitality, Dairy Automation, Banking Technology and Education. DSK Milktronics is established with a vision to provide end to end technology in Dairy Automation. The cutting edge technology enhances the productivity, quality and brings transparency in the dairy industry benefiting both the farmer and the dairy. We are focused on bringing innovative cutting edge technology solutions for dairy segment and integrate the products and services to create customized solutions enabling technology based dairy transformation. We are proud to be first company in Indian Dairy segment to develop, innovate and manufacture an INDIGENOUS “DAIRY ROBOT” for milk collection at various levels of milk collection process & “THAW MONITOR” for increasing the successful A.I. ratio. We are ref & suppliers for products like AMCUC Systems (6 variants), BMC Data loggers, Dairy software’s (4 variants), Milking Machines (3 variants), Green fodder system, Cow Mats & other cattle feed nutrition products.

Kiloskar Pneumatic Co. Ltd.

Kiloskar...at the heart of Industrial Refrigeration. Kiloskar Pneumatic Co Ltd [KPCIL] is part of Kiloskar Group [over 1.5 Billion USD turnover]. KPCIL provides total solutions of Refrigeration Compressors & packages (Reciprocating and Screw), Refrigeration & Gas Compression Systems for Oil and Gas / Chemicals & Fertilizers, Vapour Absorption Chillers, Marine HVACR, Air Compressors and packages, Gears and Gear Boxes etc.

Illies Engineering (India) Pvt. Ltd.

Illies Engineering (India) Pvt. Ltd. was founded in 1893 in Parkasak, Japan by German merchants. C. Illies & Co., with its headquarters in Hamburg, Germany is present in 13 countries, having 28 offices in Japan, China, Korea, Taiwan, Vietnam, India, Indonesia and Italy. We are a reliable partner to a wide range of innovative industries by offering technology, engineering and services solutions. Traditionally focused on trade and import of capital investment goods on our own account, we serve industries like Food & Beverages Processing, Flexible Packaging, Machine Tools etc. We strongly believe in the potential of the Indian Food Processing Industry and is thus specially focused on this sector. We represent and support many renowned manufacturers in various sectors of the Food processing industry.

Pietribisai Michelangelo S.r.l.

Pietribisai has a 50 years old experience in producing equipment for the dairy industry and has expanded the range to all kinds of liquid food. Core business of the company is flash pasteurization and thermal treatment in general.

DSM Food Specialities

Royal DSM N.V., a Netherlands based global company, creates innovative products and services in Life Sciences and Materials Sciences that contribute to QUALITY OF LIFE! DSM Food Specialties (Business unit of Royal DSM Group) is a global supplier of advanced Food & Dairy ingredients with business worth Euro 3.7 billion.

KHS GmbH

KHS GmbH is a multinational company with 59 locations in 37 countries and employs some 22,500 people globally. The company has 59 service and sales offices in North America, Europe and Asia. KHS is a billion Euro company in Nordborg, Denmark, the company has 59 locations in 37 countries with products being sold in over 100 countries. KHS focuses on the food, beverages and pharmaceuticals industries and provides emission control solutions for most sophisticated packaging projects, such as building layout, process automation solutions, packaging development, setting up laboratory, and packaging testing.

Parksons Packaging Ltd.

Gable Top Packaging Solution – From Parksons Packaging Ltd. Parksons Packaging’s foray into Gable Top packaging solution brings you the world’s most preferred packaging for milk and many other dairy products that ensures your product reach consumers fresh and secure just the way you intend. Gable Top Packaging keeps dairy products fresh and offers what the brand owners recognize as packaging being a key element of consumer’s brand experience. Gable Top cartons are fibre based, designed to retain all the essential nutrients of milk while preserving the taste. These are produced from paper using trees from responsibly managed forests, a renewable resource. Gable Top cartons produced by Parksons at its state of the art plant located in Chakan, Pune is a superior alternative to traditional packaging and offers many advantages such as better display & branding, brand protection & disposal, transportation & storage, better quality, taste and convenience. Made from a fully recyclable material the carton itself has a very low carbon footprint.

Cable Top packaging solution that is already accepted and trusted in over 96,000 square feet. IDMC is a leading Industrial Refrigeration, Ventilation & Air conditioning (HVAC) company with a brand promise oftomorrow do more with less.

Danfoss is a world leading supplier of industrial solutions and services, including design, manufacturing, development and sales of components and systems for use in energy-efficient solutions and climate-friendly solutions with high repeat customer index is testimony to this on the product performance, quality, reliability and technology. The bottom line....The Lowest Cost of Ownership, prompt after sales service with wide services and service dealers network makes us the most preferred name in the field of Milk processing, preservation, Milk products and ice cream.

Other Exhibitors

We are accredited by National Dairy Development Board and support many renowned manufacturers in various sectors of the Dairy industry. A 59

Dairy Culture and Enzymes with acquisition of DSM Food Specialties are one of world leaders in Euro 3.1 Billion. The success of the world’s Dairy, Processed food, Fruit solutions to two distinct challenges in today’s suppliers for Dairy Industry around the Globe. Other cattle feed Nutrition products.

ROBOT” for milk collection at various levels of Dairy segment to develop, innovate and technology based dairy transformation. Create customized solutions enabling enhances the productivity, quality and brings Automation, Banking Technology and edge technology solutions for dairy segment. DSK Milkotronics is established with a vision to DSK Milkotronics Private Limited Stall We have wide range of Dairy Enzymes Cheeses. like Nisin and Natamycin Culture Range is designed specifically for the units; butter production machines; ripening pasteurization of ice cream mix and beverages; Culture Range Huber is the world’s leading company in the treatment. With over 33,000 installations Germany for specialized wastewater treatment District Milk unions since 1996. Repeat orders. Development Board and many prominent milk “Perspective plan” project. We have supplied Stall 3

Danfoss is a world-leading supplier of technologies that meet the growing need of food supply, modern infrastructure, efficient energy utilization and climate friendly solutions. The Group is divided into two business segments: Danfoss Climate & Energy and Danfoss Power Solutions. Danfoss Climate & Energy’s key expertise lies in food refrigeration, air conditioning systems, controls for electric motors, heating systems for buildings, and for renewable energy, including solar and wind energy. Danfoss Power Solutions’ key expertise is in hydraulic systems for powering mobile machinery used in agriculture, construction, materials handling, and specialty equipment. Danfoss is a privately-owned company that has grown and improved its skills and expertise in energy-efficient solutions over the past 80 years. Headquartered in Næstved, Denmark, the company has 59 subsidiaries and 17 offices, with sales offices in 58 countries with products being sold in over 100 countries and employs about 22,500 people worldwide.

Danfoss Industries Private Limited, an industry leader focused on climate and energy efficient solutions, is a 100-percent owned subsidiary of Danfoss Group. Danfoss meets the growing need for infrastructure, food supply, energy efficiency and climate-friendly solutions with its technologies finding applications in areas such as refrigeration, air conditioning, heating, micro-hydro power and mobile machinery. Established in 1998, Danfoss is headquartered in Oragadam, Chennai with a nation-wide sales and support network comprising of 10 offices, a manufacturing unit, R&D centre, strong network of channel partners. Mr. Ravichandran Punuthothaman is the President of Danfoss in India. With a renewed brand promise ‘Engineering Tomorrow’, Danfoss engineers technologies that enable the world of tomorrow do more with less.

KHS GmbH KHS GmbH is a global company with a history going back over 140 years. Driven by the vision of being the first to build filling systems for what was then the new ‘invention’ of bottled beer, KHS is now one of the leading manufacturers of innovative filling and packaging systems serving many different customers in the beverage, food, and non-food industries worldwide. The company is a wholly-owned subsidiary of Salzgitter Klöckner - Werke GmbH, which is part of the Salzgitter Group. Core expertise lies in the development and production of both single machines and entire lines. Thanks to considerable experience gleaned from decades of expertise in the design of lines and machines, KHS GmbH can offer its customers valuable skills and proficiency. Especially for the dairy markets customers can find all they need with regard to reliable aseptic PET filling systems for optimum product safety and particularly sustainable packaging. KHS aseptic and ESI filling lines can handle a large variety of neck and container sizes. This helps our customers to satisfy a whole range of consumer requirements at the grocery store, providing the precise packaging sizes required. This principle leads not only to significant material savings regarding the chosen bottle sizes/volumes; it also helps to avoid food waste. In this regard, one of the top advantages within the wide portfolio of services is the Bottles & Shapes program. This is a future-oriented cooperation service for the individual design and production of PET bottles, helping you to make the best of your PET bottles.

Goma Engineering Pvt. Ltd. GOMA ENGINEERING, a company more than 30 years old, provides Turnkey solutions from concept to commissioning of Dairy & Food Processing projects, such as building layout, machinery layout, erection of the plant and machinery, formulation of the products, packaging development, setting up laboratory, training to manpower. Goma manufactures equipment like Homogenizer, Pasteurizer, Skid Mounted Process modules, Crate Washers, Cup Filling & Sealing machines, Centrifugal Pump, Continuous Freezers. Goma undertakes turnkey projects for Dairy, Ice-cream, Yoghurt, Fruit Juice, Pulp, Tomato Ketchup Processing lines.

Goma, an ISO 9001-2008 company, headquartered at Majiwada, Thane, near Mumbai owns office building of 7,000 sqft. area with all modern amenities with SAP program installed. Goma’s manufacturing facility (1st Unit) 50 k.m. away from Thane, sprawls on 5 acres and with more than 60,000 sqft. built up factory building with modern amenities for material handling, machining, assembling, testing, storing etc. and availability of technicians.

Goma has regional offices all over India i.e., at Kolkata, Bangalore, Chennai, and Delhi, with technically sound regional heads. Experto To - Kenya, Tanzania, Ethiopia, Nigeria, South Africa, Sudan, Australia, France, Malaysia, Vietnam, Indonesia, Switzerland, UAE, Oman, Algeria, Tadkent, Bangladesh, Sri Lanka, Nepal, Bhutan, Burma etc.
The cost of building a cold store is about 3 times that of an ambient store which depends upon the degrees of temperature required for the storage of particular types of products. The second considerable cost is the cost of running the store (the cost it needs to be the more costly). In order to optimize the operation costs, the Volume V/S Space equation needs to be balanced in a scientific manner. This balanced can be achieved to its best with the help of an ideal storage solution specially designed by SSI Schaefer. The maximum space utilisation for optimum cold store performance becomes one of the major objectives of all the cold stores. Mobile Racking System from SSI Schaefer is an ideal storage solution for more space on less surface area. With the installation of Mobile Racking, 80% of the warehouse floor space is utilized, having maximum 2 aisles: Picking Aisle and Cross Aisle. SSI Schaefer mobile racking system is designed with the Remote Control. By pressing a button on the remote control unit, any aisle can be opened by choosing the corresponding radio frequency. At the same time, the travel paths of the mobile racks and the forklifts are coordinated without any delay. Whole rows of rack are moved forward together, eliminating aisles. Special features integrated into this system include the picking function, allowing the customer to concurrently open 2 or more aisles and enable picking for orders, as well as automatic lighting via the system’s control panel which switches the roof lights on for the active aisle only, while all other lights are kept off. This undoubtedly serves in considerable cost savings on what is today arguably the most expensive running cost in this country, electricity.

**Essential Strengths of Mobile Racking System: **
- Maximum storage capacity within a given space
- Minimum space requirement for a specified storage capacity
- Floor space utilisation up to about 80%
- Direct Access to all pallet locations results in higher selectivity
- Considerable reduction in staff cost through intelligent storage strategies
- Highest economic efficiency
- Easily expandable due to enlargement of the vehicle fleet
- Can be adjusted flexibly to current handling rate and storage capacity requirements.

---

**Induction Sealing Technology & Inspection Systems**

Established in 1974, we are one of the leading manufacturers of Induction Cap Sealing Machines. For the past 3 decades we have been helping us not only revamp the Sealing Technology from sustainability point of view but also have provided several innovative sealing solutions to the Food, Pharma, agriculture, Petrochemicals and many other Industries across the globe to maintain product safety, freshness, deliver higher productivity, enhance marketing and support cost reduction. Today in 2014, we have a happy family of 10,000 customers spanning over 70 countries. Our R & D Team has had ample of opportunity to help on large and complex projects, and have successfully designed and delivered sealing heads that have sealed millions of products day after day. So, if you have a product filled in a bottle / container, no matter what shape & size, we will seal it.

---

**A.T.E. Envirotech Private Limited**

A.T.E. Envirotech was established in 2000, and is an A.T.E. group company since 2008. The company is headquartered in Mumbai, and is certified under ISO 9001:2008. With a team of highly experienced professionals, the company has built upon strong capabilities and expertise in the areas of wastewater management. It now offers state-of-the-art, comprehensive solutions for wastewater treatment and recycling, including zero liquid discharge (ZLD).

The company undertakes turnkey projects as well as upgrade of existing wastewater treatment plants. The company also offers value added services like quality audits, treatability studies including bio-assays and pilot and improvements projects. Value added products such as enzymes, micronutrients and microbial cultures are offered for optimizing process performance and enhancing operating efficiency.

---

**SPP Pvt. Limited**

SPP PVT LIMITED, is a leading manufacturer, exporter, technology developer & turnkey projects & equipment supplier for Dairy Processing Industry, Food & Fruit Processing Industry, Chemical Processing Industry, Herbal Extraction Plants, Gelatin Processing Plants & also manufacturer of Zero Liquid Discharge Effluent Treatment Plant for various Industries. SPP is catering need & demand by serving the nation for the last 32 years. Today SPP has four manufacturing units, with a total manpower of 500+.

**Exports:**

SPP has exported number of projects, plants & equipments to over 48 countries which includes USA, Mexico, Canada, Cyprus, Denmark, Russia, Ukraine, Egypt, Vietnam, Malaysia, Algeria, Nigeria, Ethiopia, Chad, Tanzania, Kenya, Libya, South Africa, Saudi Arabia, Iran, Afghanistan, Pakistan, Bangladesh etc.

**Achievements:**

- **R & D CENTRE:** “SPP” has its own Research & Development Centre, which is recognized by DSIR, Ministry of Science & Technology, Govt. of India, its aim is to develop new technologies of international standards and process solution to industrial problems. The state of the art R & D Centre is fully equipped with the latest technology, facilities and instruments which help us to conduct various researches and trials as per the latest industrial requirement. We can conclude by saying that our R & D centre is truly the best ground for experimentation, introduction, innovation, and invention.

**Achivements:**

- The index of achievements of “SPP” include the “Outstanding Export Performance” for the year 1998-99 in the category of food processing machinery by the Engineering Export Promotion Council; “Highest Export Performance” during the year 1999-2000 amongst the SSS exports in food processing by the Engineering Export Promotion Council, Award for All India, Certificate for export excellence during the year 2002-2003, Excellence award in productivity, quality, innovation and Management presented by Institute of Economic Studies, Award for Export Excellence during 2003-2004 for Food Processing Machinery and a trophy for highest exports during 1999-2000 from EIEP.

**Product Range:**

---

**A.T.E. Envirotech Limited**

A.T.E. Envirotech works across industry verticals like textiles, dairy, sugar and distillery, pharmaceuticals, petrochemicals, chemicals, healthcare, food processing and buildings. The company has already executed over 200 projects in India and other countries that include USA, Zambia, Puerto Rico, Tanzania, Philippines, Ethiopia, Malaysia, Thailand and Indonesia. It has built a strong base of highly satisfied customers, many of which have placed repeat orders.

The company also partners with Huber of Germany for specialized wastewater treatment equipment. With over 33,000 installations worldwide and presence across 60 countries, Huber is the world’s leading company in the field of wastewater treatment and sludge treatment technology.

---

**Micron Industries Pvt. Ltd.**

We take pleasure to inform you that Micron Industries Pvt. Ltd. has been catering relentlessly to the Dairy & Food Industry for the past 15 Years. Micron specializes in the manufacture and marketing of a complete range of equipments exclusively for the Dairy & Food Industry like Homogenizers , High Pressure Pumps, Yoghurt Cup Filling & Sealing Machines, Ice Cream Cup & Cone Filling and Closing machines, Butter Forming & Wrapping Machines, Micro Blenders, etc.

After the successful performance of our equipments and earning considerable reputation in the manufacture & sales of the above mentioned equipments, MICRON has added an additional focus to serve the Ice Cream Industry. MICRON started manufacturing Ice Cream Cup & Cone Filling Machines since 2009 and has earned considerable liking from the Industry. MICRON has also started to design and manufacture Ripple Pumps and Fruit Feeders. Further expanding our activities, one of our major important projects is the successful commissioning of the "AUTOMATIC CANDY LINE" which is working satisfactorily for our customer for the past one year.

We are proud to be associated with us some of the leading names in the industry like AMUL, NESTLE, DINSHAWS, VADALIA, KARA CAN, HALDARAM’S, ILOCIO, LAZZA, and many other reputed brands.

We are pretty sure that the industry will accept our NEW products in the same way as they have brought, supported and appreciated our equipments in the past.

---

**Dairy & Pharma Fitting Co.**

Manufacturer of Sanitary Stainless Steel Pipe Fittings and valves CNC machines components. Our Vision is to become a leader in stainless steel CNC machined forged components and to improve company’s competitiveness with export oriented product. Dairy and Pharma fitting company is stainless steel sanitary flow products manufacturer in Mumbai. The company initially performed to fulfill the needs of local food, dairy, beverage, pharmaceutical and chemical industry as import substitution products.

Our quality is from our effort based on high quality products, competitive price and satisfactory, the company welcomes your league and sincerely awaits your visit.

Dairy and Pharma Fitting Company remain as the quality manufacturers of stainless steel sanitary fittings and CNC machined forged components.
Ideal storage solution specifically designed for the food industry.

Control

By pressing a button, the racking system can be controlled with the Remote Control.

80% of the warehouse floor space is used, thus creating an ideal storage solution for more storage on less space.

Second, considerable cost is the cost of running the cold storage. To ensure the degrees of temperature required for the product safety, freshness, deliver higher quality products, and satisfy high-end customers, the supply chain of every food company needs to be audited, treated, and managed properly.

Technology from sustainability and enhancing operating efficiency.

The company has built up strong relationships with its customers, many of which have placed orders for multiple years. Today in 2014, we have a happy family of 10,000 customers spanning over 70 countries. Our R&D Team has had ample of resources to develop new technologies, including in various industries, in 1986 Mr. Manubhai Harani started ARMEC to provide various cooling projects. Later in the year 1977, Mr. Manubhai joined the unit to handle the western region of the India. Over a period of time as the company grew and looking at the need of compact industrial chilling plants in various industries, in 1986 Mr. Manubhai started manufacturing the same in the name and fame of “ARMEC COOLING SYSTEM LTD.”

This unit has grown to a limited concern in 1997.

A = Air Conditioning
R = Refrigeration
M = Mechanical
E = Electrical
C = Consultant

ArmeC has all the latest state of the art manufacturing facility required to produce quality chilling plants with setup area of 36000 Sq. feet. The company’s team of engineers designs the machines for smooth functioning, allowing no or minimal waste of power to get the desired output becomes a continuum, eliminating the need of interception for inspection or snags. These manufacturing approaches eliminate downtime.

Achieve the total customer satisfaction is our main motto. We are having all type of in house production facility with good infrastructure.

We provide TOTAL SOLUTION for COLD ROOM / Walk in Cooler with PUF panel, Door, Condensing & Evaporating units, Etc. Control panel, Refrigerated Van (from 3 wheeler to large vehicle), Blast Chiller/Freezer, Incubation Room, Various Chilling Plants, Ice Building Tank, Bulk Milk Chiller, Ice Candy Production Machine, Hardener and all type of commercial freezers.

We export our products to U.S.A., Uganda, Kenya, Sri Lanka, Nepal, Zambia etc.

Company has received Industrial Leadership Award for Industrial Development and SKOTCH Achiever Award 2014 and Certificate of Merit for qualifying amongst India’s Best SMEs 2014.

Guangdong Yuedong Mechanical Industry Co., Ltd.

Guangdong Yuedong Mechanical Industry Co., Ltd is the vice-chairman of China National Food & Packaging Machinery Industry Association, managing director of China Dairy Industry Association, director of China National Plastic Machinery Industry Association, vice-chairman of Guangdong Food & Packaging Machinery Association and the HI-TECH enterprise, Guangdong Famous Brand, Guangdong advanced enterprise of intellectual property. We have been devoting ourselves to the design and manufacture for foodstuff, drink, dairy, packing, plastic machine and provide customers with the complete equipment since the company was established. We have been improving our products, till now we have gotten more than 198 patents for invention, practicality and new-style. Our machines are equipped with imported electrical system and pneumatic components made in Germany and Japan to keep the leading advantage of the manufacturer and the supplier of parts and equipment for mechanical and thermal separation for various applications and industries.

For online visitor registration: www.iideindia.com
We, Samaran Fabicicators Pvt. Ltd. take this opportunity to introduce ourselves as a leading manufacturer of packaging machines to pack liquid and different types of liquid/solid/granular/powder products and have supplied over more than 10,000 systems to various industry/sector such as dairy sectors, edible oil, mineral water, rice, sugar, salt, atta, tea, coffee, snacks food, detergent, pesticide, spices, pharma products, cosmetics etc. We belong to the company based samaran group of companies comprising of Samaran Fabicicators Pvt. Ltd, Select Packaging Machinery Pvt. Ltd., Samaran Services etc. Having factories in Mumbai, bangalore and hardwar.

We are specialized in manufacturing and marketing of:-
1. Vertical form fill seal machine to pack liquid like milk, water, oil and other viscous liquid and solids like rice, atta, tea, salt, snack foods, spices, pesticides etc.

We would also like to place on record that we have started manufacturing liquid FFS machine, packaging machine to pack liquid like milk, water, oil and other viscous liquid since 1978 in collaboration with prepac, france and our experience and know-how of the global engineering and refrigeration compressor's worldwide market, both commercial and industrial. Our foray into India, as Frascold India Pvt. Ltd, comes at a time when the country is poised to be a global manufacturing hotpot alongside the likes of China. Our high performance is a systematic result of our experience and know-how of the global compressor markets, our quality standards based on the use of best components sourced from Europe and strict testing, and an engineering and design driven innovation. Their coming together in a streamlined manner is in many ways the root of our success also and the foundation pillars of our venture into India.

We believe we can contribute these values and expertise to not only raise market expectations but also help the industry as a whole to meet them. It is in the sustainable growth of our industry that we envision our larger role and responsibilities and we well understand the benchmarks we will have to redefine to achieve this."

Fillpack Technology is a market leader & solution provider of first choice in Filling Packaging Solutions with its core competency in Dairy Industry. The company based in Mumbai was established in the year 1980 with business transactions being carried out in all states of India as well as international. The company deals with varied range of products, namely:-
3. Curd / Lassi / Shrikhand / Ice cream Cup Machine for Glass and PET bottle.
7. Homogenizer, Sterilizer, Crate Washers, Steel Tanks etc.

Fillpack Technology, Stall B 02

range of solid, powder and granular products. Our end to end solutions range from Filling, packaging machines to pack free flowing liquids in pouches of virgin material.

ifm stands for high­quality products “Made in Germany”. ifm is closely connected to Germany as a location for industry with its corporate headquarters in Essen and a development and production site in the Lake Constance region.

INOXPA, A Spanish multinational company pioneered in manufacturing of world class industrial equipments such as Pumps, Mixers, Blenders, Agitators, Valves, fittings & Skids for Food, Dairy & Beverages Industry. We are delighting our customers through our offerings from 1972 when started operation in Banjara, Spain and to date having a wide range of network in 5 continents with more than 100 distribution points. In India, INOXPA started operation in 2008 in Pune under the name of INOXPA INDIA Pvt LTD. Our product ranges comprise of:

1. Centrifugal Pump
2. Positive Displacement Pump
3. Mixers
4. Blenders
5. Agitators
6. Valves & fittings
7. Skids

REPUTE ENGINEERS PVT LTD emerged as a leading engineering company by providing innovative process technologies & engineered processing plants and machineries for the food, dairy & beverage processing industries. Associating with world leaders for most of the key equipment & systems, along with the technical expertise and on board experience made a strong Team REPUTE. It has become the preferred choice for the food, dairy and beverage industry since its inception in 1998. Wide range of products and services offered by Team REPUTE are:

1. Milk & Milk By Products Processing Plants & CIP System: REPUTE design, manufacture & supply Milk & Milk products Processing Plants for Pasteurized Milk, Curd, Yoghurt, Ice Cream & Flavoured milk. Automatic & Semi automatic CIP plants with single / multi circuits provided by number of tanks as per the process requirement.

2. Soft Drink & RTS Beverage Processing Plants & CIP System: REPUTE design, manufacture & supply complete syrup room for carbonated soft drinks. For the Ready to Serve (RTS) beverage industry, with natural fruit contents, complete preparation and processing plants including Sugar Syrup Preparation, Blending, Processing and CIP Systems are provided.

3. Homogenisers & High Pressure Piston Pumps: REPUTE is the exclusive representative of M/s BERTOLI S.r.l. Italy. High Pressure Homogenizers & piston pumps in India. Homogenizers are provided with high efficient power saving homogenizing devices & self aligned pistons (patented technology). Homogenizers are widely used in Dairy & Beverage processing plants. There are more than 150 machines are working satisfactorily in India. Repute provide prompt after service along with original Bertoli Spares to its customers.

4. UHT Plants, Centrifugal Separators, Bactofuges: REPUTE is the exclusive representative of M/s REDA SPA Italy for their Multi product UHT processing plants, Centrifugal Separators, Bactofuges etc. REDA UHT Plants are highly energy conservative, advanced instrumentation controls oriented & user friendly. REDA Self cleaning Centrifuges (Clarifiers, Separators & Bactofuges) & automatic standardization units are skid mounted compact design with PLC based touch screen operation.

5. Cheese Processing Plants: REPUTE is the exclusive representative of M/s MIKILAB Srl, Italy in India. World leader mozzarella cheese plants & machinery manufacturing MIKILAB equipments have innovative, advanced technology. Most of the equipments are patented for its unique design. REPUTE provides the milk processing line & MIKILAB provide the plant machineries from the cheese vat to the complete processing.

6. Ice Cream Machinery: REPUTE is the exclusive representative of M/s Tekno Srl, Italy in India for their ice cream plant & machines like continuous freezers, extrusion lines, cup and cone filling machines, fruit feeders and Ripple pumps. REPUTE provide ice cream mix preparations, pasteurization, homogenizers, aging vat, flavouring tank & CIP systems. TEKNOICE together can offer complete ice cream plant of any type & of any capacity or individual equipments as per the requirement.

7. Tubular Heat Exchangers, Scraped Surface Heat Exchangers & Sanitary Valves: REPUTE is associated with CSF Group of companies, M/s MBS S.r.l. Italy & M/s Bardani S.r.l. Italy in India for Tubular Heat Exchangers, Scraped surface heat Exchangers & Sanitary valves respectively. MBS Tubular Heat Exchangers are widely used in Food, Beverage & Pharmaceutical industries. Scraped surface heat exchangers are used to process high viscose food products. Bardani Sanitary valves are one of the best in the world & available in all types, materials of construction to suit the requirement of Food, Beverage & Pharmaceutical industries.

8. Aseptic Pouch Filling: REPUTE is the exclusive representative of M/s Thimonier, France in India for the sales & service of their Aseptic Pouch Filling Machines. Thimonier Aseptic filling machines are provided with advanced technologies & full proof operating system controlled by PLC with its touch screen control panel. Thimonier filling machines are directly connected to aseptic processing plant with out any intermediate tanks, through a leak proof valve & the filling is done by gravity, which will ensure the accuracy of volume in every packets. The machine is fully access to CIP (Cleaning in place) & SIP (Sterilisation in place). No manual cleaning required for the filling machine or its parts.

9. Plate Heat Exchangers: REPUTE is the exclusive representative of M/s Thermowave GmbH Germany, in India for the sales & service of Semi welded & gasketed heat exchangers. Thermowave heat exchanger modules are available from minimum size of 0.09 sq.m. to the maximum size 2.0 sq.m. heat transfer area per plate. These Heat Exchangers are widely used in the Industrial Refrigeration & HVAC. In the Food & Dairy Industry these heat exchangers are generally used as Evaporator and Condenser for the preparation of instant Chilled /brine water for the processing plants. REPUTE provides the skid mounted units ready to be connected with the compressors to Ammonia refrigeration.

Team REPUTE’s Head quarter & state of the art manufacturing facilities are in Pune. Sales & Service network is spread across the country. Team REPUTE enjoy the trust & support of all section of the Food processing industry, from Corporations, Federations, Corporates, Multinationals, Private entrepreneurs & Merchant exporters.

Team REPUTE wishes to express their thanks & gratitude to all of their esteemed customers, well-wishers & critics for their valuable contribution in making the REPUTE in its letter & spirit.

Shiv Traders Instrument’s Pvt. Ltd.
Company is engaged in distribution & export of high quality engineering products & every product dealt by FX Multitec stands for quality & durability. Dealing in vast range of products in Air Conditioning & Refrigeration, below is the range of products we are having all India Distributorship of -

- Danfoss Make Air Conditioning & Refrigeration Products; Reciprocating/Scroll Compressors, Condensing Units, Line Controls, PHE & Amonia Controls.

FX Multitec is a prominent organization dealing in Air conditioning & Refrigeration, Water & components. Founded in the year 1994, company has vast Global & Industrial Marketing experience & has presence in almost every major city in India & in expanding wide presently.

Water Roller, Germany make Evaporators (Indoor Units) for Cold Rooms, Blast Rooms & Processing Rooms.

Thermofin, Germany make Evaporators for different applications in commercial & industrial cooling.

Transfer Oil, Italy make Comax Capillary Hoses for HP/LP Connection, Oil return lines and Pressure equalization Lines.

The Swiss company REFCO make Refrigeration Service products & Components like Vacuum Pumps, Vacuum Gauges, Pressure gauges, manifolds, Refrigerants, Charging hoses, Leak Detection, Tube Cutters, Tubing tools, Flaring Tools, Tube Benders etc.

DSJ, Denmark make Plate freezers

ESK, Germany make Oil management and Hydro control.

We hope by having a wide range of products as above we can cater to every need of our customers in Air Conditioning & Refrigeration industry.

Anton Paar and Aurora India Pvt. Ltd.

"Anton Paar develops and produces high-quality measuring and analysis instruments for industrial and research applications. Founded in 1922, Anton Paar is the leader in density, concentration and CO2 measurement and in the field of rheometry. The state-of-the-art product range also comprises Small Angle X-ray scattering systems, Instruments for Surface Characterization, Viscometers, Refractometers, Polarimeters, Microwave synthesizers, Microwave digesters, Petroleum testing instrumentation and a range of Process instruments. Anton Paar India Pvt. Ltd. is headquartered in Gurgaon - NCR Delhi. Our sales and service centers are located in Mumbai, Kolkata, Chennai, Bangalore, Hyderabad, Vadodara and Ahmedabad and four application support centers in Gurgaon, Mumbai, Bangalore and Hyderabad controls.

Our team of more than 80 people all over India keeps us very close to our customers and ensures quick response times as well as the possibility to obtain our products and services from factory trained and experienced specialists."

Hangzhou Zhongya Machinery Co., Ltd.

Founded in 1992 and located in Hangzhou, Hangzhou Zhongya Machinery Co., Ltd is one of China’s national high-tech key enterprises and one of the leading companies in China’s packaging industry, with more than 90 units of tooling machines mainly imported from Germany, Japan, United States and Switzerland. Devoted to the research and manufacturing of various packaging and bottling machines, Zhongya current manufactures over 40 varieties of machines categorized into 11 categories. Our machines are widely used in dairy, beverage, pharmaceuticals, daily chemicals, food and other industries. In recent years, we passed the ISO9001, ISO14000 and ISO12000 certification. All our equipment is manufactured, assembled, tested, packed and delivered to our end customers under strict control of these three systems. Thanks to 22 years of hard work, we have sold more than 2,000 sets of machines to international companies like DANONE, Coca-Cola, Pepsi, COFCO, Mengniu Dairy, Yili Dairy, Bright Dairy, Rexam, and others in over 40 countries and regions worldwide. In the future, we shall continuously enhance the developing and manufacturing capacity of our high-quality products to meet the request from global customers.

- Medical Industries. The MULTIVAC Group's focus is now on tubular, air heat-sealing film, in a series of plate, tube and roll films, and other herbs and intermediates.

Rensa Tubes Hygienic & Ultra High Purity Stainless Steel ERW (ERW, MP Polished) Tubes in India

We are pleased to introduce RAHUL FERROMET & ENGINEERING PVT LTD prides itself as one of the leading manufacturers for Hygienic & Ultra High Purity Electro Polished & Mechanical Polished Stainless Steel Tubes for more than 15 years in India. We understand the importance of surface finish and Weld Bead Quality in piping system, and to provide the best solution to END users/OSMs, for piping systems, RAHUL FERROMET & ENGINEERING PVT LTD has set up the world class manufacturing facilities for hygienic tubes in India with the brand name of, which is ISO 9001:2008 & B.3A Sanitary Standard Inc. accredited. is proud to be a leader in industrial innovation, which is reflected in our designs, production methods & technologies. Serve customers in various industries like Semiconductors, Bio-Tech, Pharmaceuticals, Pharma Machinery, Water Treatment Plants, Food, Dairy & Dairy Products and Beverage Industries. RENSA TUBES are manufactured to meet different regional standards and also custom-built products are available upon request.

Product list: - 3A stainless steel sanitary tubes, ASME BPE stainless sanitary steel tubes, ISO/IMSS stainless steel sanitary tubes, BS4625 stainless steel sanitary tubes.

Krishna Allied Industries Pvt. Ltd.

Established in 1999 and located in Ningbo, China, LEEPAK is a professional manufacturer devoted to design, manufacturing, and installation of dairy products and beverage filling line. Our company owns more than 50 professional engineers, over 200 skilled workers, and an excellent team mastering advanced filling technology. Meantime, our metal processing workshop possesses first-class machining centers and CNC machines. It established the foundation of LEEPAK’s leader position of domestic bottling manufacture and exporter.

Ningbo Leepak Machinery Co., Ltd.

Our main customers include YILI Dairy, MENGNIU Dairy, BRIGHT Dairy, SANYLIAN Milk, DANONE Group, and other famous dairy companies. Our overseas business covers Southeast Asia and Africa. Through 15 years’ hard work and efforts, LEEPAK established independent Stainless Steel Tank workshop in 2003. Till now, LEEPAK has designed and made ultra-clean fermentation tank and clean milk storage tank for TETRA PAK, SPX and BRIGHT Dairy. Since then, we fully set up “Pre-processing & Packaging” pattern. LEEPAK becomes one of the rare domestic companies who is able to supply whole solution of liquid dairy processing, filling and packaging.

Till 2014, LEEPAK Machinery has sold out over 600 sets of filling machines, and over 100 units of bottling lines. We also finish turnkey projects for over 30 dairy companies. In the next decade, LEEPAK Machinery will continue to create brilliant future along with our cooperation partners.

Shandong Bihai Machinery Co., Ltd.

Established in 1998 and specialized in producing beverage machinery, Shandong Bihai Machinery Co., Ltd mainly produces aseptic brick-shape paper carton packer and paper/aluminum/PE liquid food aseptic packing paper. Bihai company covers area of 1600m2 with fixed assets of RMB170,000,000 and more than 600 employees. Having 62 advanced process equipments and 2 aseptic paper production lines, the production capacity reaches more than 120 aseptic brick-shape paper carton packers and 1.8 billion paper/aluminum/PE liquid food aseptic packing paper.

Bihai company provides not only top quality paper carton packing equipment but also good quality aseptic packing paper with reasonable quality and service.

Duke Thomson's India Pvt. Ltd.

Innovating technologies for healthier food products! Established in 2000 keeping “Nature Conscious” as our mission, we could achieve formidable and sustained growth with the full support of the Industry. Confidence bestowed by our patrons, decades of research expertise and dedication of the R&D teams of our Suppliers together with our technical team, we aspire to be the best solution provider to the food processing industries. Routine Testing kits to Preservation we touch every sphere of food production. Quality, Economy and Promptness are our keys to success. Our extensive product range includes Rapid Food Analysis Kits like Antibiotic Residue screening tests in milk, Allergens in various food matrices, Hygiene Monitoring Systems, Dairy cultures, Microbial rennet, Flavours, Stabilizers, and Antioxidants etc. We represent various Multi National Companies, which are dedicated international specialists in their respective field in India as their Sole Distributor cum Technical Support Team.

With a dedicated, young, talented team of technocrats who are professionally qualified, experienced and vibrant, coupled with the expert guidance from company’s suppliers and clients, we have been able to touch practically every food industry, and has maintained ethical relations with its client companies. The three pillars of its business and success are: Quality, Economy & Promptness. Vision: Ingredients & Ideas for Healthier Products for Genext!

Kanha Milk Testing Equipments Pvt. Ltd.

Kanha Milk Testing Equipments Pvt. Ltd. is a sister concern company of Sony/Vision India. Sonyvision India is one of the most recognized and highly reputed manufacturer and exporter of wide range of Electric equipment. Batteries of extremely high quality and international standards. Now Sonyvision India introduce a well fame brand Kanha Milk Testing Equipment Pvt. Ltd. The company was established in 1984 and within two decades we gained recognition as the leading manufacturer of Inverter and Stabilizer of outstanding quality. We came into the production market with the objective to innovate, enhance the quality standard and constantly improve the functioning of power saving electronic products. We are committed to provide quality standard products and services to our prestigious clients offering them value in terms of price and quality.

Since our beginning, we have brought in the manufacture and exporter automation in the dairy farms, the different units of measurement allows effective communication with Milk-Analyzer, Ultrasonic Stirrer and Data Processing Unit.

We are proud of the fact that our firm contributes to the progress of Dairy Industry and the adaptation of new technologies in India by offering state of the art products in the ever expanding field of Dairy Science.
Confidence bestowed by our technocrats who are professionally qualified, Team.

The process of presenting products of outstanding reliability and performance that starts right at the d e s i g n i n g , developing and extends the same till manufacturing stage. Lechler Group has manufa-

stating units spread over in UK, USA and India. Lechler India has a strong technical and financial backup from the parent company that also includes access to their R&D facilities in Germany. Since 1993, Lechler India at their factory in Thane manufactures about 22000 types of Precision Spray Nozzles (Flat jet, Hollow cone, Full cone etc.) with latest CNC and Special Purpose Machines.

Qualified and well­trained engineers utilize the latest CAD technologies for design work for understanding and fulfilling the demanding atomization needs at customers for specific application. Lechler India is ISO 9001:2008 certified by RWTVU, since 1998. From d e v e l o p m e n t , t h r o u g h m a n u f a c t u r i n g to i n s t a l l a t i o n s, lechler products are s u b j e c t to c o n s t i n u o u s Quality Management, State­of­the­art Testing and Inspection methods, often in excess of our ISO 9001 certification, guarantee the durability, reliability and longevity of Lechler spray nozzles & systems. Lechler India also exports a part of local production.

The complete range of the Lechler Products includes Pneumatic atomizing nozzles, Full cone spray nozzles, (Axial & Tangential Flow), Hollow cone spray nozzles (Axial & Tangential Flow), Solid jet nozzles, Flat spray nozzles and complete range of Tank cleaning nozzles. Depending upon operating pressures, desired volumes and the demanding applications, Lechler well­trained engineers can offer the most suited spray nozzles. Lechler specializes in designing and manufacturing Self Rotating High Impact Tank Cleaning Nozzles. These include Mini whiting tank cleaning nozzles in SS and PVDF for smaller tanks, Stainless steel whirling tank cleaning nozzles for medium tanks and for double­walled Gyro tank cleaning nozzles and high impact turbine cleaning machines for bigger tanks. Lechler has a tank cleaning nozzle for every CIP system and for wide range of tanks sizes right from 400mm diameter till 16 meters diameter apart from traditional Stationary Spray Ball installations.

These compact, robust, non­clogging, low­maintenance and self rotating specialty nozzles, driven and lubricated by the cleaning medium, ensure powerful and systematic all round effective cleaning as demanded by widespread industry such as Dairies, Wineries, Breweries and Distilleries, Pharmaceuticals, Chemical, Dyers, Paint, Paper and pulp and in general Food and Beverage industry.
Metro Polythene Manufactures

Aesthetic impression in FLEXIBLE PACKAGING

We introduce ourselves as one of the reputed manufacturer of the following flexible packaging applications:

1) 5 Layer Co-extruded films [High Gas Barrier with Nylon-6 & EVIn] for various food packaging, laminating applications, Edible oil, Vanaspoti & Cheese, packaging etc.

2) 3/5 Layer Co-extruded films for Edible oils, Milk, Cheese, Vanaspoti, Atta, Shampoo, Detergent and laminations applications, etc.

3) LDPE Based Shrink film & Bags (for group packaging) printed or unprinted

Shanghai Precise Packaging Co., Ltd.

Shanghai Precise Packaging Co., Ltd is a high-tech jointly enterprise established by the team led by Mr. Jiang Weidong with a number of well-known international risk investment. By centering on the research, development and management personnel, the company has gathered more than 80 talents who are professional in electromechnical integration, automatic control, mechanical design and food project etc., and formed a powerful team based on high-tech talents. For over twenty years, it has been specialized in the research, development and manufacturing of dairy products and intellectual property patents. By adhering to the conception of innovative technology, the company has introduced advanced technology and management mode from home and abroad to provide various high quality equipments, packing materials and integral solutions for global customers with steady support.

Veripack Solutions India Pvt. Ltd.

Veripack – complete MAP & Vacuum packaging machinery solutions for best shelf life......

Veripack Solutions India Pvt. Ltd.

Veripack Solutions India Pvt. Ltd is the 100% subsidiary of the Italian packaging major group FNC SpA, established since 1927 and has more than 5 decades of manufacturing excellence in niche horizontal rollstock thermoform – fill – seal & tray sealing packaging machines.

Veripack niche packaging technologies are very ideal for modified atmosphere packaging (MAP) and vacuum packaging pack formats which are very critical for achieving highest shelf life of the packed products’. Today in India, the Veripack packaging technology has the best references for the widest wide range of products like ethnic snacks, dairy, dry fruits & dates, meat & poultry, ready meal, fruits & vegetables and many more.

Veripack Solutions India Pvt. Ltd. (

Veripack India) is a complete & modern company has introduced advanced technology & Intellectual property patents. By adhering to the conception of innovative technology, the company has introduced advanced technology and management mode from home and abroad to provide various high quality equipments, packing materials and integral solutions for global customers with steady support office in India at Mumbai. Also the Veripack Demo Centre in a different location at Mumbai suburbs where both the packaging machinery of horizontal rollstock thermoform – fill – seal machines and tray sealing packaging machines are available for live machinery technology demonstration, sample making, trials and shelf life studies.

For further details on Veripack’s exciting packaging machinery products range, please visit www.veripackindia.com or email to sales@veripackindia.com.

Veripack is focussed to become Indian customers’ most trusted packaging machinery partner and please visit Veripack at booth no: A53.
